

No **single** alternate system can
mobilize and reach the citizenry
of America like the religious
community. America must be
mobilized **now**. This is the time.
This is the place. We **are** dedi-
cated to empowering these
grassroots.

We **Provide** this funding
mindful that no program can
change a life Only
faith can reach into a **heart**
and Turn it from death to life
But government can **help** with
the day-to-day **duties** that
free you up to fulfill your high
calling. And thats what the

The Compassion Capital Fund

Below you will find a list of 2002 Compassion Capital Fund Intermediaries. These organizations will provide capacity building technical assistance so that faith- and community-based organizations can more effectively access various Federal funding sources, improve their ability to operate and manage their programs, develop and train their staff, expand the reach of their programs into their communities, and replicate programs that are promising. These organizations are able to make sub-grants to be used for start-up and organizational costs.

Please use this list to contact the groups that are working in your area for training and technical assistance.

green light

yellow light

The following pages are a journey through our Department's grant opportunities for faith-based (FBO) and community-based (CBO) organizations. Each program has been rated according to the type of opportunity it presents to these small grassroots organizations.

A green light indicates that small grassroots groups are eligible for these funding opportunities and that the application process is relatively straightforward and simple. FBOs and CBOs that apply for these grants will find the application process for these grants the easiest to understand. If this is your organization's first time applying for a Federal grant, you should consider these opportunities.

Programs with a yellow light present some "hoops" in terms of the application process. FBOs and CBOs are eligible for funding, but in order to qualify, they may have to meet certain requirements (e.g., pursue 501(c)(3) nonprofit status, etc.). A yellow light should not be a discouragement, but it indicates that for some groups it might take a little more preparation to be eligible to apply.

A Red light means stop. This grant is not available to faith-based or community organizations. This may be due to the type of grant (e.g., block, formula) or the purpose of the grant (e.g., research). Most red lights are red because they are a block or formula grant, for which only states are eligible. Block grants are identified with bricks under the stoplight. It is still important to know about these grants, because faith and community groups can often apply directly to the states for these funds. The block grant simply means that grassroots organizations apply

to their states for these funds.

We intended to share this information in a way that was easy to access, so we did not include lengthy program descriptions. Instead, we included the Catalogue of Federal Domestic Assistance (CFDA) number for each program listed. This number will help you link to everything you need to determine if this grant might be of interest to your organization. By clicking on: <http://aspe.hhs.gov/cfda/index.htm> you will be able to enter the CFDA number and link to all the information you will need to apply for the grant, including the eligibility requirements, program description, etc. We have also included, where it applies, the web address of the program and contact information for the people who run the program.

We hope that this will be a helpful resource in identifying potential federal dollars to fund your programs.
